

PROJECT

Desktop Design

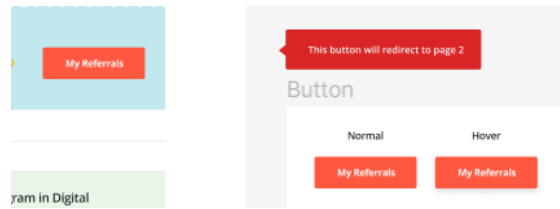

1. This is landing page. This is the first webpage user should see, when it is opened in the browser.
Create header, footer as separate components, so that they can be used in all the webpages.

2. This is the next page selected when user selects from the dropdown. User should be able to add data when user click on Add button. Add validation.

3. Create a hover on My referrals button as shown below.

4. Data should be displayed in same place and new input should come for user to add the data. There is delete button, if user click on delete that record should be deleted. User should be able to copy the code and referral code. Style the submit button as mentioned in card below.

Select a program to refer :
Certification Program in Full stack Development

Kindly submit the candidate's information you are referring. Get them to register with this information.
